## DETAILED ACTION

### *Information Disclosure Statement*

1. The copending applications by the inventor have not been considered because pending applications are not available to the public, and thus are not considered to be prior art.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is not clear what a “basis object” is. In particular, it is not clear whether a “basis object” is a physical portion of the device being modeled, such as a particular portion of the heart or thorax or other object; or whether a “basis object” is a more abstract mathematical equation or concept, where a plurality of mathematical equations are combined to create the model. Also it is not clear what the relationship is between a “basis object” and a “basis function”; whether they are interchangeable terms describing the same entity, or whether basis functions somehow are used to define basis objects, or whether they are related in some other way. Along the same lines, it is not

clear what a “spatial relationship” is, and how the various basis objects interact with each other to create the model.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms “basis object” and “spatial relationship” are not clear, for the reasons discussed above. Also, the claims contain numerous instances of the terms “capable and “can”, as for example in claim 1 (“capable of being transformed”) and in claim 5 (“can be performed”). These phrases make it unclear whether the ensuing claim limitations are intended to be positively recited as part of the claimed invention.

Because the basic scope of the claimed invention is unclear for the reasons discussed above, no examination of the claims in light of the prior art is possible at this time.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Metaxas, Waltermann, Beavin, Sinclair, Dubois, Chui, Nackman, Groothuis, Kunii,
